DSCallards

Harnessing the power of the
world's leading software
technologies to
deliver business innovation

Established in 1993, DSCallards is dedicated to delivering world-class software solutions to organisations across the UK, with areas of expertise that include:

- Business Intelligence
- Customised development solutions
- Specialist developer tools

Bringing Together the World's Leading Technologies

With a head office in Devon, UK, DSCallards brings together and harnesses the power of the world's leading technologies to provide added value to organisations and government departments. In addition, DSCallards is a specialist development resource, providing developers and businesses with advanced software technologies, an exclusive portfolio of training and consulting services and an application development capability.

Diverse Customer Base

Our diverse customer base of over 1,000 clients across all industry sectors in the UK is testimony to the broad appeal of our products and solutions. To name a few, DSCallards work with organisations such as Britvic Soft Drinks Ltd, General Dynamics, Kellogg Company, N M Rothschild & Sons Ltd, Southampton City Council, Virgin Media and Zurich Financial Services.

Strategic Partnerships

DSCallards' affiliations and approvals from key industry partners ensure that our products and solutions are at the cutting edge of technology and are able to meet the ongoing needs of our customers. Working with only the best, our partner network includes world renowned and well respected organisations such as Business Objects, Oracle, Microsoft and IBM.

DSCallards ... delivering sophisticated software technologies and services

Business Intelligence Experts

The Power of Business Intelligence (BI)

At DSCallards we recognise that an organisation's key challenge is the gap between their business applications and their business goals. Linking the masses of business data to business goals can remain an illusive challenge. This is what we call the 'Business Gap' and this is what DSCallards can help you to address.

www.crystalreports.co.uk

Our combination of Business Objects technology, services and education addresses the complete scope of any project. Our dedicated website, www.crystalreports.co.uk is a specialist resource that can be tapped into to find out information on the latest product releases and trends within the world of Business Intelligence.

Driving Innovation

This unique mix allows us to take ownership of projects ranging from product installations to strategic business transformations. Our toolbox of technology, processes and people elevates products to solutions, drives innovation and ultimately creates the highest value for your organisation.

- User training: Onsite or public courses
- Business Intelligence Consultants
- Data Warehouse Design and Build
- Ad-hoc Queries: Mentoring
- Dashboard Visualisation and Development
- Crystal Reports Expertise

As a Gold Partner with Business Objects and voted the top European Reseller of Crystal Reports software in 2007, DSCallards is well placed to provide you with the help you need to deliver your Business Intelligence project.

Delivering BI Expertise

DSCallards regularly run BI user groups and seminars to illustrate our depth of knowledge in the BI tools and technologies that we deliver.

Customised Development Solutions

Need a solution to a unique problem?

With an expert team of developers and using a set of pre-defined methodologies, DSCallards have a first-class record of delivering custom software projects to budget and on time.

DSCallards use leading edge application development tools and technologies to produce professional solutions at an affordable price.

- Tailor-made development
- Flexible and creative approach
- Quality at the heart of all we do
- Cutting edge technology
- Application integration

“DSCallards performed a miracle”

Woodland Commercial Ltd

Tailor-Made Development

DSCallards have been providing software development services since 1993 and offer a tailor-made development capability, primarily focused on server-side development, utilizing the latest technologies such as .NET framework, Ajax, ASPX and Web Services and languages such as XML, C#, Visual Basic and Java to interface with back-end business and legacy systems to newer web-based technologies.

Quality at Our Heart

DSCallards place a high priority on producing high quality, tested products and to endorse this commitment to standards, DSCallards have the BS EN ISO 9001:2000 quality standard certification.

“DSCallards provided a solution that understands not only the technology, but also the business issues and benefits required”
Torbay Council
