Development
Services

- Tailor-made development
- Established in 1993
- Flexible, creative approach
- Quality at heart of all we do
- Cutting edge technology
- Application Integration

At DSCallards we pride ourselves in our flexible and creative approach to delivering effective solutions to meeting business needs.

The DSCallards Development Team has a range of skills and experience of working with blue-chip clients and government organisations so understand the pressures on application development projects, regardless of size.

TAILOR-MADE DEVELOPMENT

DSCallards have been providing software development services since 1993 and offer a tailor-made development capability, primarily focused on server-side development, utilising latest technologies such as .NET Framework, AJAX, ASPX and Web Services and languages such as XML, C#, Visual Basic and Java to interface with back-end business and legacy systems to newer web-based applications.

Whether it is a small section of a large project, extra resource to ensure that a project is completed on time, or full end-to-end development service, our team has the necessary skill set.

FLEXIBLE AND CREATIVE

Our people enjoy providing creative input as well as technical expertise for the projects that we work on. Our core competence is our understanding of organisations, their requirements and business processes.

QUALITY AT THE HEART

DSCallards place a high priority on producing high quality, tested products and to endorse this commitment to standards, DSCallards have the BS EN ISO 9001:2000 quality standard certification.
